Value – Added Effect

CAT assessments taken at the start of the A Level course provide predicted outcomes. Early teacher intervention and consistent effort can have a huge impact on outcomes.

Value Added Measure

When comparing CAT predicted outcomes to actual outcomes, we can measure the value-added to each student. If we consider individual predictors versus actual performance, many of the students in R12 achieved significantly improved grades, when compared to what was anticipated at Year 10 stage:

Student	Predicted	Achieved
1	2A, 8B	10A*
2	1B, 7C	6A, 2C*
3	7B, 2C	7A*, 3A
4	2B, 6C	5A, 3B, 1C
5	9C	1A*, 2B, 1C*, 5C
6	2C	1A, 5B, 1C
7	2A, 8B	3A*, 4A, 3B
8	7A, 3B	8A*, 2A
9	0 pass grades	3B, 4C

Every GCSE subject performed either at the level, or significantly above the level predicted by CAT. Most notably however, was the fact that, all subjects significantly outperformed at the top grades:
